Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ransom, II in view of Hetrick.

Ransom, II teaches all the limitations of the claims except for a spinner plate mounted below the storage hopper. However, Hetrick discloses a storage hopper 50 with a spinner plate 76 and a motor M coupled to the spinner plate (see figure 2). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Ransom, II with a spinner plate mounted below the storage hopper as suggested by Hetrick. Doing so would provide an effective way to dispense particulate material (see column 1, lines 25-30).

With respect to claims 5-9, 11-13, the Ransom, II having the timer delay circuits 52 and 100, both of the timer delay circuits connecting to motors 50 and 18 capable of performing the different feeding regimens as disclosed in column 2, lines 52+, and column 5, lines 23+. Therefore, it would have been an obvious matter of design choice to modify the device of Wilmers or Focke et al or Reinicke et al or Gipson et al to obtain the invention as specified in claims 5-9, 11-13.

Allowable Subject Matter

3. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

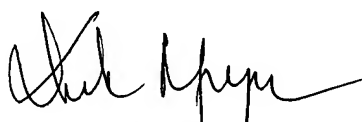

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a feeder: Yang, Papkov, and Gal et al.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.
